

M.S. project in landscape ecology (to start Fall 2024):

I am seeking a graduate student to join my lab to conduct M.S. research on geospatial dynamics of ephemeral wetlands as a function of land-cover change, with subsequent characterization of dynamic landscape connectivity.

Prospective students will be funded for three years by a 9-month/year departmental Teaching Assistantship and possibly by additional graduate school fellowships (with awards ranging from \$2500 for 1 year to \$30,000/yr for 3 years).

Preference will be given to students with experience/coursework in landscape ecology, remote sensing, and GIS.

Skills that will be acquired:

- Experience with ArcGIS
- Experience with Google Earth Engine
- Experience with R
- Connectivity analyses
- Curation of spatial datasets
- Scientific communication

To apply:

Application deadline: 30 November 2023.
